README

Sayak Kundu

- Upload the notebook named **Crypto_Pipeline_&_Modelling_FINAL.ipynb** present in the **notebook** folder to Google Colab in GPU mode.
- Please change the username and key for using the Kaggle API.

```python
import json
token ={"username":"","key":"|"}
with open('kaggle.json', 'w') as file:
    json.dump(token, file)
```

  Put **username** with your username and **key** with your key from Kaggle's API.
- Run each cell one after another sequentially.
- Keep a copy of **SystemExplanations.pdf** documentation with you while going through the code.
- File Structure is shown below

```
.
├── docs
│   ├── README-SayakKundu.pdf
│   └── SystemExplanations.pdf
└── notebook
    └── Crypto_Pipeline_&_Modelling_FINAL.ipynb
